Summary

Seasoned Software Engineer with over 15 years of dedicated experience in web development, specializing in backend technologies with a strong emphasis on the Python programming language. Engineering philosophy is deeply rooted in the principles of KISS, comprehensive test suites, and humility. Approach consistently aims to deliver optimal results through simplicity and reliability while minimizing technical debt. Likes and respects legacy code.

Work Experience

Nimble CRM

Los Angeles, USA

SENIOR SOFTWARE ENGINEER → TECH LEAD

Dec. 2015 - Dec. 2024

- Everything related to platform's stability and performance.
- Designed and built an automation framework that enabled users to create and run custom rule-based sequences of actions on their contacts and messages.
- Led refactoring of one of the core features - "Deal Pipelines". It involved a complete API and storage redesign (MongoDB → PostgreSQL).
- Orchestrated and executed a major migration from Python 2.7 to Python 3.9. As well as data migration between major versions of PostgreSQL.
- Moved a payment module out of the main monolith into a microservice.
- Maintained and improved the CI pipeline. Most notably, reduced the running time of integration test suite from almost an hour down to 15 minutes by adapting test cases to be safe to run in parallel.
- Spearheaded migration from unittest to pytest. Implemented the bulk of reusable fixtures.
- Provided technical expertise and mentorship for a small team of backend engineers.
- Worked on improving the visibility into the platform health and performance by maintaining Kibana dashboards and ElastAlert rules.
- Implemented a fully-featured 2-way contacts synchronization between Outlook and Nimble contact records.

Wargaming (Persha Studio)

Kyiv, Ukraine

SENIOR SOFTWARE ENGINEER & TEAM LEAD

May. 2013 - Dec. 2014

- Led two small teams working on two independent projects.
- Maintained and added features to a legacy company service responsible for delivering game updates (patches) to the users.
- Designed and built a new and improved version of this update service. Implemented entire server provisioning orchestration using Fabric, Ansible, Chef, and TeamCity.
- Took part as a mediator between different departments and teams.

Nimble CRM

Remote, Ukraine

SOFTWARE ENGINEER

Feb. 2011 - Jan. 2013

- Worked on integrating a payment gateway (Braintree) into the platform for subscription management.
- Designed and developed a sub-system for synchronizing users' email inboxes into Nimble. Notably, it supported all popular providers like Gmail and Office 365, plus arbitrary email servers via IMAP.
- Worked extensively with various third-party APIs (social networks, data providers, Google Search API, and such) for data retrieval and synchronization.
- Built a Group Messages feature that enabled users to send mass emails from their connected email accounts and track engagement.

Postindustria

Mykolaiv, Ukraine

JUNIOR SOFTWARE ENGINEER

Apr. 2009 - Feb. 2011

Joined the company as a Junior Python Developer and immediately dove into working with Linux, Python, JavaScript, and PostgreSQL. Primary responsibilities revolved around developing backend APIs for two services: an advanced advertisement platform with a carousel of banners and a sophisticated algorithm for banner selection, as well as comprehensive admin interfaces for managing advertising campaigns. Also contributed to the development of a social network aimed at encouraging charity involvement and sharing achievements. Additionally, gained exposure to JavaScript and its frameworks while debugging and modifying frontend logic. Quickly earned a high degree of autonomy within the role.

Skills

Programming	Python, SQL, JavaScript. Personal interest in Go, C, C++
Back-end	REST API, Queues and tasks processing (Celery + RabbitMQ), Async, Unit and end-to-end testing, Web frameworks and servers (Django, Tornado, FastAPI, Nginx, gunicorn)
DevOps	CI/CD (GitLab), ELK, Docker and Kubernetes
Databases	MongoDB, PostgreSQL
Other	Design and Architecture, VCS, Azure Cloud, Data migration and synchronization, Mentoring, Linux, Payment Gateways
Languages	Ukrainian, English

Education

Ukrainian National Shipbuilding University

MASTER'S IN COMPUTER SYSTEMS

Mykolaiv, Ukraine

2005 - 2011

Hobbies

I enjoy spending my time outdoors, whether simply strolling around the block or running in the mountains. I find great satisfaction in perfecting simple, quick, and delicious meals. I consider learning a life-long endeavor, be it a new programming language or how to milk goats. I love books, especially in history and health/wellness genres.
